

Halloween 6 Use a 2-column layout

In this exercise, you'll enhance the formatting of the home page so it uses a 2-column layout. You'll also add some additional content to the page. When you're through, the page should look similar to this:

Specifications

- Move the unordered list to a sidebar that's floated to the left of the remaining content, which should be coded in a section. The width of the sidebar should be 160 pixels. Be sure to clear the footer so it's not displayed below the list.
- Adjust the margins and padding for the sidebar and section as necessary. (Note: Because the unordered list is given some left padding by default, you don't need to apply any additional margin or padding to it.)
- Modify the HTML for the first heading in the section so it's displayed on two lines.
- Modify the second heading as shown. Then, add the image (cat1.jpg) and the link below the heading. The link should display a page named cat.html in the products folder.
